

## WORKSHEET 1:

### 1. Classify as vertebrates or invertebrates.

Frogs	<u>Vertebrate</u>	Whales	<u>Vertebrate</u>
Jellyfish	<u>Invertebrate</u>	Spiders	<u>Invertebrate</u>
Salamander	<u>Vertebrate</u>	Eagle	<u>Vertebrate</u>
Worm	<u>Invertebrate</u>	Carp	<u>Vertebrate</u>
Ants	<u>Invertebrate</u>	Starfish	<u>Invertebrate</u>

### 2. Complete the table. Write the letter.

Nutrition	Interaction	Reproduction
A F	B D	C E

- a) Foxes eat other animals
- b) Dogs run very fast
- c) Whales are viviparous
- d) Mammals take care of the babies
- e) Baby dogs are puppies
- f) Animals need water

### 3. Tick the correct box.

Animal	Nutrition			Reproduction	
	Herbivores	Carnivores	Omnivores	Oviparous	Viviparous
Shark		V		V	
Sheep	V				V
Dog			V		V
Hen			V	V	
Lynx		V			V

**WORKSHEET 2:**

**4. Classify as vertebrate or invertebrate. Write the word.**

Vertebrates	Invertebrates				
Shark	Oyster				
Horse	Octopus				
Penguin	Butterfly				
Frog	Starfish				
Duck	Crab				
Snake	Sea urchin				
Cat	Spider				
Tiger	Scorpion				
Sea turtle	Shrimp				
	Earthworm				
	Jellyfish				

**5. Complete the sentences using these words:**

Oviparous	viviparous	vertebrates	invertebrates	carnivores	herbivores
		omnivores			
Plants	meat and plants	meat	backbone	egg	mum's belly

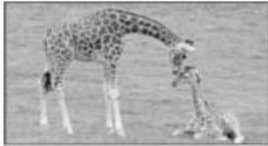

- Lions are carnivores because they feed on other animals
- Zebras are herbivores because they feed on plants
- Dogs are omnivores because they feed on plants and other animals
- Chicken are oviparous because the young develop inside an egg
- Cats are viviparous because the young develop inside the mother
- Snakes are vertebrates because they have a backbone and an internal bone skeleton.
- Snails are invertebrates because they don't have a backbone or an internal bone skeleton.

### WORKSHEET 3:

#### 6. Which is the correct sentence? Underline.

- Reptiles are invertebrates
- Fish are vertebrates
- Mammals are invertebrates
- Invertebrates also have a backbone

#### 7. Write the kind of vertebrate.

Mammals

Birds

Reptiles

Amphibians

Fish

#### 8. Which is the odd one out? Circle.

- |    |                   |                     |                    |
|----|-------------------|---------------------|--------------------|
| 1. | <u>Frog</u>       | Snake               | Tortoise           |
| 2. | Elephant          | Whale               | <u>Penguin</u>     |
| 3. | Oviparous         | Viviparous          | <u>Carnivorous</u> |
| 4. | <u>Amphibians</u> | Molluscs            | Worms              |
| 5. | Cnidarians        | <u>Invertebrate</u> | echinoderms        |

#### 9. Complete the sentences about invertebrates.

There are 5 types of invertebrates.

- Cnidarians
- Equinoderms
- Woms: they have long bodies divided into rings
- Molluscs: they often have a shell
- Arthropods: they have different number of legs

**WORKSHEET 4:**

**10. Complete the mindmap.**
