Roman numerals

Palaeolithic:

La información que hay que estudiar está en las páginas 91, 92 y 93 del libro de ciencias sociales. Sin embargo para los números romanos os dejamos una presentación en este post para que puedan repasar.

1. Complete the chart

Year	In roman numerals	Century
492	CDXCII	V
725	DCCXXV	VIII
17	XVII	I
899	DCCCXCIX	IX
1564	MDLXIV	XVI
1320	MCCCXX	XIV
2001	MMI	XXI

2. Write the year that the following centuries started and ended

III started the year 201 and finished the year 300.

IV started the year 301 and finished the year 400.

XII started the year 1101 and finished the year 1200.

XV started the year 1401 and finished the year 1500.

XXI started the year 2001 and will finish the year 2100.

3. Answer the following questions:

a) When did the Palaeolithic started and finished?

It started about 4.4 million years ago with the first human beings and ended about 12.000 years ago when humans became nomads

a) Which discovery was very important during the Palaeolithic and why?

During the Palaeolithic humans discovered how to use and make fire. This was very important because they started cooking food so they lived longer and also because it kept them safe from animals.

a) Which were the main characteristics of the Palaeolithic?

- Humans were nomads. They lived outside or in caves
- They lived in small groups called clans
- They hunted, fished and gathered fruits
- They wore animal fur to keep them warm
- They discovered how to use fire

a) What is cave painting?

During the Palaeolithic the most common form of art was paintings on the ceilings or walls of caves.

a) Which are the main characteristics of cave painting?

- Were painted with fingers or feathers usually
- They represented animals.
