4. Look at the picture and answer the questions:

a. What natural phenomenon can you see in the picture?

---

b. In what layer of the Atmosphere is it found?

---

5. What is temperature? How can you measure it?

---

---

6. What is air pressure? How can you measure it?

---

---

7. What is humidity? How can you measure it?

---

---

8. What is wind? How can you measure it?

---

---

9. What is precipitation? How can you measure it?

---

---

10. How does altitude affect climate?

---

---

---

11. How does latitude affect climate?

---

---

---

12. What is the hydrosphere?

---

---

---

12. What is the geosphere? Which are the three layers of the geosphere?

---

---

- ---

---
- ---

---
- ---

---
